ROSE PUGLISI

Senior Product Manager | B2B SaaS for Associations, Destinations and Government |Data & AI-Native

St. Petersburg, FL | (813) 922-5237 | maryrose.puglisi@gmail.com | www.rosepuglisi.com | linkedin.com/in/maryrose-puglisi

Senior-level product manager with 5 years owning roadmaps, strategy and pricing for B2B SaaS used by 500+ destination organizations, many nonprofit and membership-based, and 1,000+ government agencies. Trained incoming Product Owners, reversed churn to growth, and works AI-native, using Claude connected through MCP to Jira, Slack, Drive and code for discovery, PRDs and prototypes.

EXPERIENCE

Product Manager, Zartico **2026**

- Owned Zartico Media Attribution and took two new pipelines to market: international, with 3 customers in the first few days of sales, and county-level for state destination organizations, adopted by 4 customers pre-release.
- Redesigned Campaign Hub, where ~40 agencies manage tracking for ~200 campaigns, and added analytics for campaign performance.
- Shipped layered AI help in the customer dashboard (curated explanations first, AI answers for follow-ups) and AI-written campaign reports with rule-based wording for ~10 tested scenarios.
- Built roles and permissions that gave 200+ DMO and CVB customers direct access to their own data; support questions dropped to nearly zero.
- Ran an AI-native workflow: call transcripts into insights and Jira tickets, PRDs into epics and stories, weekly competitor tracking, and working prototypes, including scheduled report delivery and a Claude-powered knowledge-base assistant.

Product Manager, Granicus (formerly Simpleview) **2021–2026**

- Onboarded and trained incoming Product Owners and Product Managers; directed an offshore engineering team's day-to-day work as PM and PO.
- Rescued Book › Direct, a failing product with no documentation and a one-person engineering team: rebuilt it on live rates APIs and repackaged it as a paid add-on, reversing churn to net growth across 250+ clients.
- Led the Viator integration with New Orleans & Company as beta partner: first booking on day one and 700+ tours booked, $85K+ in net bookings in under four months; partner listings saw 5x engagement.
- Protected GovDelivery's at-risk FedRAMP authorization (1,000+ government clients, 8,000+ users) by cutting open vulnerabilities from ~1,800 to ~200; owned FedRAMP, GDPR and WCAG compliance.
- Led the AWS to Google Cloud migration (~15% infrastructure savings) and event logging for 1M+ events per day; shipped 10+ real-time client dashboards.

Product and Strategy Consultant, Valence *(freelance)* **2025–2026**

- Advise the founder on zero-to-one product and AI strategy for membership businesses, including automated flagging of unpaid or lapsed memberships; building go-to-market materials.

Project Manager, Personify **2020–2021**

- Implemented association and event management software for DMO, CVB and enterprise clients, owning API setup and launch; launched self-serve exhibitor sites.

Earlier career: Sales Manager, GES (2019 to 2020); **Sales Manager**, Baltimore Convention Center (2017 to 2019); **Event Operations**, Loyola University Maryland (2012 to 2016)**.** Sold and ran trade shows of 10,000+ attendees, built SQL pricing models that set margin, and helped sign a three-year NCAA agreement worth $5M in local economic impact**.**

SKILLS

Product: Strategy and roadmaps, pricing and packaging, discovery, experimentation, KPIs, Agile, Atlassian, backlog ownership
Data and technical: APIs, cloud migration (AWS, GCP), data warehouses, SQL, analytics dashboards, FedRAMP, GDPR, WCAG
AI and tools: Claude with MCP connectors, Cursor, AI prototyping, AI-drafted PRDs and stories, generative AI feature design
